FIRE ACTIVITY

Erskine, Vegetation Fire, Lake Isabella, Kern County

Transition Center

On 6/28/16, at 1200 hours a Transition Center was opened to support the repopulation effort.

- The location of the Center is Woodrow Wallace Middle School at 3240 Erskine Creek Road, Lake Isabella, CA.
- Normal hours of operation will be from 0900-1800 hours.
- The Center is to provide sensitive information and immediate personal support to the public. The Center is being supported by Red Cross, County Mental Health, Chaplain, County Human Services, Sheriff's and County OES.
- Additional homeowner re-entry information is available at <http://inciweb.nwcg.gov/incident/article/4806/31217/> and includes ash and burn debris clean-up and removal recommendations and emergency disinfection of drinking water instructions.

Call Center – (661) 873-2660

- The Call Center is available 0800 to 2000 hours, daily until further notice. The Call Center is staffed by 211 and public health employees, with bilingual capabilities.

Local Assistance Center (LAC)

- Kern County has confirmed the opening of a Local Assistance Center on Friday, 7/1/16 from 0900 to 1800 hours at the Woodrow Wallace Middle School, 3240 Erskine Creek Road, Lake Isabella, CA. The hours of operations are as follows:
 - Monday – Friday 0900 to 1800 hours
 - Saturday and Sunday 0900 to 1600 hours
 - Closed Monday, 4th of July Holiday
- The LAC will open until further notice, and at a minimum, will operate through Sunday, 7/10/16. The county plans to assess survivor participation to determine whether the LAC will be extended beyond 7/10/16.
- The following agencies are being asked to participate:
 - Contractor's State License Board
 - California Department of Insurance
 - Department of Motor Vehicles
 - Employment Development Department
 - California Department of Public Health – Vital Records
- LAC support – MIGU 5 has been deployed to the location of the LAC. Cal OES staff are on scene setting up the MIGU 5 and working with the County to identify any additional needs. Cell service is limited in the area, and concerns that additional resources may be needed to expand the capability of the existing coverage. Cal OES is actively working with CUEA and the County to ensure LAC needs are supported.

Utilities

- Inclement weather remains an issue, at this time CUEA reports that repair efforts will be adjusted to repair power infrastructure lost during the Erskine Fire. Additionally, outages are expected throughout the day. At this time 1,300 (1,700 restored) customers remain without power.
- Most of the power disrupted by the Erskine Fire is expected to be restored by the end of the week; however some customers may remain without power into the weekend.

FIRE ACTIVITY

Erskine, Vegetation Fire, Lake Isabella, Kern County

Recovery

Initial Damage Estimates and Preliminary Damage Information:

- Kern County Building, Environmental Health and Sheriff's Office representatives conducted an assessment in Squirrel Valley and South Lake. Public Health teams assessed properties affected by the fire for debris management and initial hazards; and are in the process of reviewing water systems in the area. Building Inspection teams assess safety of the structures and placed a colored tag on each structure: Red means do not enter or occupy structure; Yellow means restricted access, and specific instructions are written on the tag; and Green means lawful occupancy permitted and that no apparent structural hazard has been found.
- Cal OES Public Assistance has deployed two Disaster Assistance Programs Specialists to the Kern County EOC to coordinate hazardous materials debris operations.

Debris and Hazardous Waste Management

- Cal Recycle standing by for situational awareness and possible tasking for debris removal and are in contact with local authorities concerning landfill capacity.
- Department of Toxic Substance Control (DTSC) will be at the EOC on 6/29/16 to begin coordination of Household Hazardous Waste (HHW).
- Four temporary collection sites have been set up to assist residents from the affected areas with disposal of food waste resulting from the prolonged power outage. Items accepted at these temporary collection sites include ONLY food waste and other household trash that is placed in bags. Further efforts to address other fire debris will be set up as part of the recovery process.
- The Kern County Public Works Department has scheduled a special One Day Household Hazardous Waste Collection Event on 7/23/16 to target and collect the household hazardous waste from affected properties. For more information or updates visit the website at www.kerncountywaste.com.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

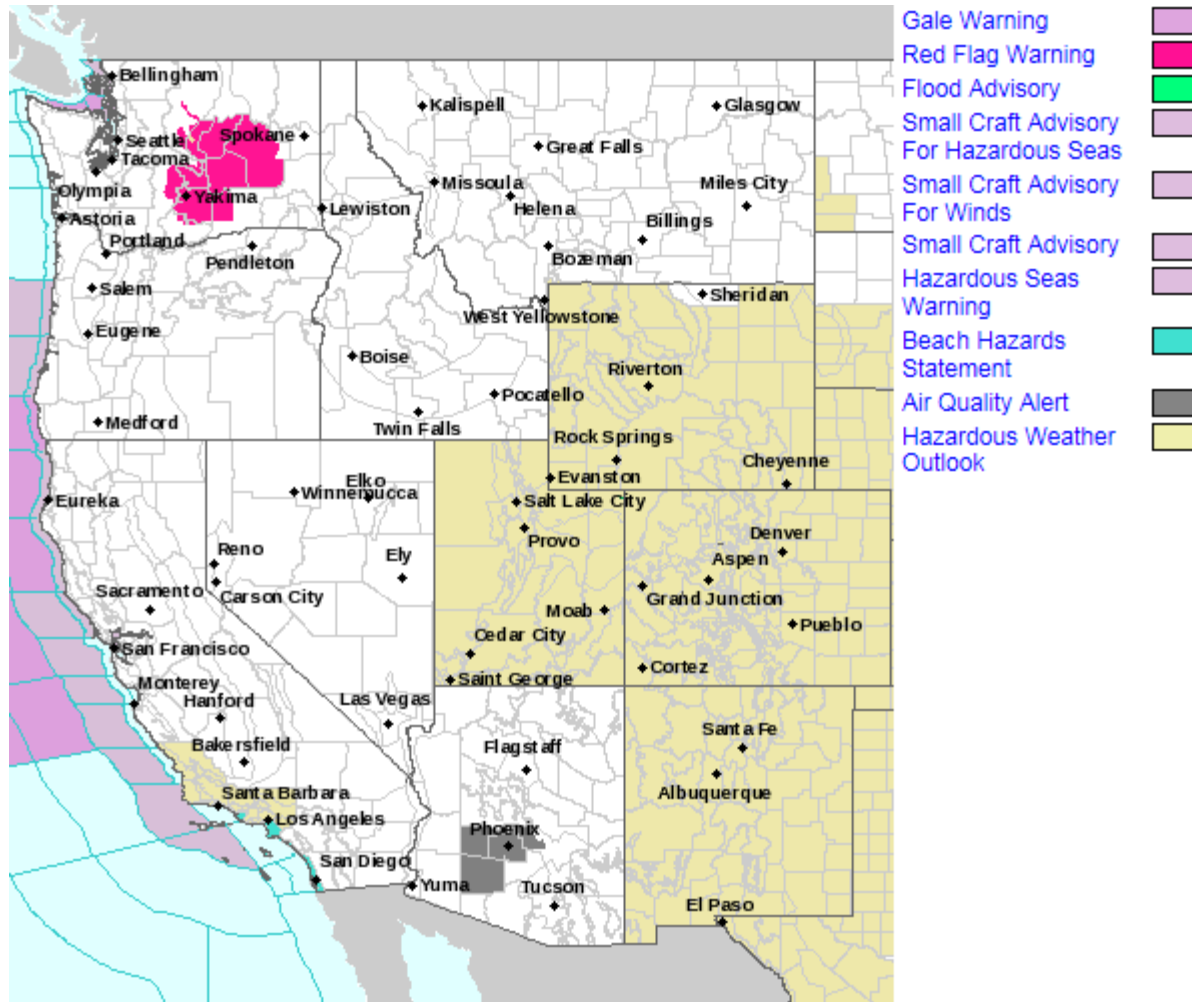

Small chances of isolated afternoon and evening thunderstorms Friday through the weekend, mainly over the eastern mountains Friday and NW mountains for the weekend. The very southern edge of a Gulf of Alaska low will begin moving into the region later today and will take over the weather pattern through the holiday weekend into next week. Even with a weak trough over the region, hot, dry weather will continue in most areas well into next week. However, there will be a slow cooling trend after Friday through next Wednesday. Today and Friday will continue to see triple digit afternoon high temperatures within a few degrees of 105, Saturday and Sunday will be more around 100, and early next week in the mid and upper 90s. Low afternoon RH and mostly moderate overnight RH recovery will also continue in most areas away from the marine layer. The marine layer has deepened somewhat and will bring overnight and morning cloudiness to much of the coast over time. A bit more moisture will be over Northern California Friday and into the weekend. Daily afternoon cumulus clouds are expected to develop over the northern and eastern mountains. Friday there will be a chance of isolated afternoon and evening thunderstorms over the eastern mountains, mainly from around Mt. Lassen southward. These storms should have some moisture, but not a lot. Isolated afternoon and evening thunderstorms are not likely to form over the NW mountains Friday through the weekend, but a small chance of that occurring can't be ruled out, either. Any that do form there may have more average amounts of precipitation (=be wetter than those anticipated over the eastern mountains Friday). Diurnal, locally driven afternoon wind patterns will prevail in most areas, so seasonable wind speeds and directions are expected during the afternoon peak burning period each day. There will be light overnight northerly winds overall, but portions of the northern Sacramento Valley will have somewhat stronger speeds Thursday night/ Friday morning than have been occurring. At this time, NO HIGH RISK conditions through the next 7 days are anticipated.

SOUTHERN CALIFORNIA

Isolated Thunderstorms in Sierras, Inyo N.F. and eastern desert today. Slow Cooling Trend through the Weekend. A weak trough will develop over the region, which will lead to slightly cooler temperatures over the next few days. Expect temperatures to be 3-5 degrees cooler this afternoon with temperatures reaching the 70s along the coast, mid 90's in the interior valleys to 103 in the San Joaquin Valley. Highs will drop to near normal by the weekend with valley temperatures in the upper 80s to lower 90s. Onshore flow will increase a bit each day which will lead to more extensive marine layer coverage by Saturday. Minimum RH today will continue to remain in the teens in the mountains with some single digit readings possible across the interior sections of the central coast region. A deeper marine layer should bring minimum RH readings back into the teens by Friday and Saturday. Gusty southwest winds of 15-25 mph with gusts to 40 mph will be possible in the Antelope Valley and Banning Pass this afternoon. Yesterday, there around 120 lightning strikes over the region; roughly half this number may occur today with the majority of the activity remaining in the desert. Isolated storms will be possible again Friday afternoon, but no further convection is expected over the weekend. Long range models indicate warmer weather will likely return by the middle of next week.
